INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP04/001334

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-24	YES
	Claims		NO
Inventive step (IS)	Claims	1-24	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-24	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

None of the documents cited in the ISR describes the invention of claims 1-24, which uses a first combustion area, a second combustion area and a third combustion area, to each of which one of rich to lean air-fuel mixtures different in air-fuel ratio is supplied for combustion in descending order of ratio, wherein the amount of air sucked into a combustion chamber is controlled in a mode different from an ordinary mode when the first combustion area is switched to the third combustion area or vice versa, to ensure that the amount of NOx emission and torque variation downstream of an exhaust emission cleaning device can be minimized when the air-fuel mixture passes through the second combustion area. This constitution is not considered to be obvious to a person skilled in the art either.
